WORK SUMMARY (2+ YEARS EXPERIENCE)

Eminence Infotech Pvt. Ltd | Indore

Aug 2022 - Present

- Over 2 years of experience in developing scalable and high-performance web applications using React.js.
- Proficient in implementing lazy loading strategies to improve loading time 40% and optimize user experience.
- Reduced unwanted API calls by integrating efficient state management using Redux and Context API.
- Focused on optimizing application performance, reducing initial load times and boosting responsiveness.
- RESTful API integration with proper error handling and throttling to avoid unnecessary network requests.
- Developed reusable components and maintained a clean, well-structured codebase following best practices.

SKILLS

Frontend Technologies	React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Hooks, Context API, NEXT.js
Routing, State & Performance	React Router, Redux Toolkit, Context API, useState, useEffect, useReducer, Lazy Loading, Code Splitting, React.memo, Caching
Mobile App Technologies	React Native
Version Control & Tools	Git, GitHub, GitLab, Vscode, Postman, zoho
API Integration	REST APIs, Axios, Fetch, React Query
UI & Styling	Material-UI (MUI), Bootstrap, SASS/SCSS
Technologies (basic)	NEXT.js, Node.js, MongoDB, Mysql

WORK EXPERIENCE

PROJECTS

Transport360 - Indore, india

Role: Frontend Lead , React.js

Aug 2022 -Present

Project Type: Transport Management System

<https://transport360.urja360.com>

- Developed a modern logistics platform to streamline transportation management, improve operational efficiency, and reduce costs through **UX-first development**.
- Built a **trip management system** capable of handling multiple LR's (Lorry Receipts), live location tracking, and automated trip reporting.
- Led the design and implementation of a **bid management system** for trip bidding by drivers and transport owners.
- Integrated **Google Maps API** for real-time vehicle tracking and intelligent route planning.
- Engineered a scalable frontend using React.js, with **custom hooks**, **reusable components**, and a clean **import/export** architecture.
- Implemented **lazy loading**, **code-splitting**, React.memo, and **Context API** for global state and rendering optimization.
- Managed **complex UI flows** with multiple modals, scroll-based dropdowns, dynamic options, and minimized redundant API calls.

Dharti Thora Ri – Bikaner, Rajasthan, India

Web - React and Mobile App - React Native

Nov 2024 - April 2025

Role: Frontend Lead , React.js

<https://cms.dhartidhorari.com>

Project Type: Marriage / Events Hotel Management System

- Developed a custom hotel and event management system tailored for Indian wedding operations.
- Streamlined venue booking, guest tracking, and event scheduling in one unified platform.
- Designed a culturally inspired, user-friendly UI aligned with the venue’s traditional aesthetic.
- Optimized the system for high-traffic wedding seasons and multi-event coordination.
- Enhanced customer experience through responsive design and intuitive workflows.

ElectionEasy – Indore, India

Role: Frontend Lead , React.js

March 2024 - Nov 2024

<https://electioneasy.in>

Project Type: Marriage / Events Hotel Management System

- Developed a custom hotel and event management system tailored for Indian wedding operations.
- Streamlined venue booking, guest tracking, and event scheduling in one unified platform.
- Designed a culturally inspired, user-friendly UI aligned with the venue’s traditional aesthetic.
- Optimized the system for high-traffic wedding seasons and multi-event coordination.
- Enhanced customer experience through responsive design and intuitive workflows.

KARAN Group – Dubai, UAE

Jan 2023 - Jan 2024

Role: Frontend Lead , React.js

<https://app.karanfms.com>

Developed a logistics platform to optimize transportation operations, integrating real-time vehicle tracking, route planning, and automated reporting. Key technologies and features included:

- **Google Maps API** for route optimization and real-time tracking.
- **React Query** for efficient data fetching and synchronization.
- **Context API** for global state management across the platform.
- **Reusable components** and hook to enhance code modularity and maintainability.
- Trip & fleet management features for driver tracking, cargo weight monitoring, and fuel station integration.

Delivered a scalable, user-friendly platform for improved operational efficiency.

EDUCATION

Bachelor of engineering in Electronics and communication

Oriental institute science and technology bhopal(M.P.),India

STRAIGHT

- Strong leadership & team collaboration skills
- Problem-solving mindset with attention to detail
- Ability to deliver under tight deadlines
- Excellent communication & client-handling skills
- Quick learner and adaptive to new technologies

LANGUAGES

- English – Professional proficienc
- Hindi – Native

HOBBIES & INTERESTS

- Listening bollywood music
- Learn different things
- Cricket
